Let's Be Clear

Daavlin Phototherapy Solutions for Psoriasis and Vitiligo

1 Series is the **Clear Solution** for localized light therapy. 1 Series is flexible, compact and powerful.

Daavlin 1 Series • Flexible • Compact • Powerful

Daavlin delivers a clear solution for psoriasis, eczema, and vitiligo... here's how:

1 Series clears your skin

- Typically patients have very brief treatments about three times a week.
- It is common for psoriasis symptoms to show improvement in as little as 6 – 8 treatments; vitiligo usually begins to re-pigment within about 8 weeks.
- This medical device requires a prescription from your doctor.

1 Series offers comfort and convenience

- The unit can lie flat, stand on end or on its side to easily treat any area of the body.
- An optional stand accessory allows the unit to pivot and rotate for even greater flexibility.
- A special UV transmitting acrylic shield covers and protects the lamps and provides a comfortable surface to rest the hands or feet on during treatment.
- The light weight and small size make the 1 Series very portable and perfect for travel.

1 Series is small, but powerful

- Special ballasts and unique U-shaped lamps work together to give the 1 Series a surprisingly high output.
- Can be equipped with Daavlin's Flex Dosimetry, a control option for measuring power output and assuring proper treatment while at home.
- Plugs into a standard household electrical outlet.
- Accepts a variety of lamp types, including Narrowband UVB, UVA, UVA1, and Blue Light.

Safe and Easy to Use

Phototherapy is safe for most patients, including those who are pregnant, elderly or immuno-compromised. Protective acrylic prevents accidental contact with the lamps and UV blocking eyewear is provided to protect you while you are using the unit.

An Affordable Choice

Home phototherapy units are reasonably priced and frequently covered by insurance, including Medicare. Daavlin's free insurance assistance program does the work for you!
